

Colloquium on
Cancer & Premalignant Conditions

 **January 11, 2026**

 **8:30 AM Onwards**

 **Hyatt Regency, Ashram Road, Ahmedabad**

Message from the Organizing Committee

Oral cancer and premalignant conditions continue to pose a significant clinical challenge, particularly in the Indian subcontinent, where early detection and timely intervention can dramatically alter outcomes. Dentists and oral healthcare professionals play a critical frontline role—not only in diagnosis, but also in multidisciplinary decision-making and long-term rehabilitation.

The Colloquium on Cancer & Premalignant Conditions, being held on **11 January 2026 at Hyatt Regency, Ahmedabad**, is designed to address these responsibilities head-on. This focused academic program will cover practical approaches to oral lesions, updates on potentially malignant disorders, biopsy techniques, imaging, MDT participation, and post-treatment rehabilitation—bridging theory with real-world clinical application.

Through expert talks and panel discussions, the colloquium aims to strengthen clinical judgment, encourage interdisciplinary collaboration, and enhance the dentist's role within tumor boards and comprehensive cancer care.

We cordially invite dental practitioners, postgraduates, and students to participate in this academic initiative and contribute to advancing early diagnosis and improved outcomes in oral cancer care.

Warm Regards,
Organizing Committee
